

ARUN

SOFTWARE DEVELOPER

PROFESSIONAL SUMMARY

I am a Software Developer . I have developed projects on both large and small Problems by creating clean and maintainable code. My biggest achievement in this role is developing an application that increased productivity of the organization by 20%. My expertise includes JavaScript, Python, HTML, CSS. I am highly organized, detail-oriented, and have exceptional problem-solving skills. My ability to think critically and find innovative solutions makes me an asset in any software development team.

EXPERIENCE

- August 2023 - September 2023

C++ Intern

Technohacks

C++ Intern at Technohacks: Developed core components of company's software platform, gaining valuable experience in C++ programming and object-oriented design. Demonstrated strong problem solving skills by troubleshooting complex issues related to software architecture. Successfully completed a six-month internship.

- September 2023 - October 2023

web developer intern

Bhartintern

I was a web developer intern at Bhartintern, where my primary responsibilities were to create and maintain website structures and applications, as well as to develop design solutions. During my time at Bhartintern, I was able to build strong relationships with clients and colleagues, and gain valuable experience in web development.
